hydrorise implant

SIMPLY ACCURATE

Hydrorise Implant is the high-rigidity addition silicone ideal for impression taking in implantology.

It detects with precision the three-dimensional position of implants, allowing the dentist to **get an accurate impression on the first try.**

**Ask your dentist to use Hydrorise Implant
and make your daily life 3 times easier!**

01.

We care for the simplification
of your daily work.

Easy to cast and remove.

Being an addition silicone and due to its special formulation, the model can be easily removed from the impression, even in the presence of limited undercuts.

02.

We care for your safety.

Easy to disinfect.

The impression made with Hydrorise Implant is compatible with spray and liquid solutions specifically formulated for impression materials. Limit the risk of cross contamination and use a material that reduces any dimensional change.

03.

We care for your efficiency.

Easy to read.

The impression is scannable with the most common scanning systems in the market without using dulling sprays.

Recommend Hydrorise Implant to your dentists to take advantage of these benefits*.

Hydrorise Implant is the first step to a successful restoration for implantology.

*Intro pack available for dentists on request. Ask your local representative.

Achieving excellence, together.
